GROUP C ALOSCA® 25 kg

CAUTION AVOID EXPOSURE TO DUST

Wear a dust mask to prevent inhalation. Wear eye protection and gloves and appropriate clothing (long pants and long-sleeved shirt), to avoid eye and skin contact.

STORAGE & USAGE INSTRUCTIONS

Application rate

Standard application rate 10 kg/ha.

Timing & seed bed requirements

Any time including dry seeding – moist seed bed not required to maintain inoculant viability prior to germinating rain.

Seeding method

ALOSCA® can be mixed/layered with the fertiliser, the seed or from a third box as long as it is delivered to the furrow in close proximity to the seed (deep or side banding not recommended).

For higher clay content soils it is recommended ALOSCA® products are mixed/layered in the seed box with the seed to ensure good seed contact.

Handling & machinery transfers

Keep dry during delivery, storage, handling and application.

Avoid use when seeding equipment is damp or where the product will come into contact with moisture prior to reaching the seed bed.

Avoid over handling. Due to the friable nature of the product it is recommended to minimise machinery transfers (augers etc) of product to the seed/fertiliser box. Layer ALOSCA® with seed or fertiliser into the seed or fertiliser box or transfer vehicle and allow subsequent transfers or seed box drawdown to mix the product once diluted with the seed or fertiliser.

Pesticide compatibility

Physically buffers rhizobia against the harmful effects of pesticide seed dressings.

WARRANTY

The product must be used as per label directions and instructions. The manufacturer accepts no liability or responsibility for any loss arising from failure to follow product directions and instructions. The liability of the manufacturer is limited to that imposed by statutes and is limited to replacement of the product or the refund of the purchase price.
